

Product Requirements Document (PRD)

Product: Tech Soutenir Website & Client Platform

Client: Tech Soutenir

Date: January 2026

Version: v1.0 (MVP)

1. Product Overview

Tech Soutenir is a modern technology consultancy providing reliable tech support, IT services, and digital solutions for individuals and businesses. The website will serve as a **professional digital front door**, a **client engagement platform**, and a **foundation for future platform expansion**.

This MVP combines:

- A public-facing business website (Landing Page)
 - A mini service/product catalog (non-transactional)
 - A secure client portal
 - An admin management system
-

2. Goals & Objectives

Primary Goals

- Present Tech Soutenir as a **credible, modern, and reliable tech consultancy**
- Enable clients to **request services and manage engagements digitally**
Improve **internal workflow and service delivery**
- Build a **scalable base** for future full e-commerce and platform features

Success Metrics

- Increased service inquiries via website
- Client adoption of portal for uploads, tracking, and communication
- Reduced manual coordination via email/WhatsApp

- Improved turnaround time for client requests
-

3. Target Users

Primary Users

1. Individuals

- Require computer repair, installation, or tech support
- Limited technical expertise

2. Small & Medium Businesses

- Need IT support, virtual assistance, websites, cybersecurity, or consulting
- Value reliability, structure, and documentation

Internal Users

3. Admin / Tech Soutenir Team

- Manage clients, projects, files, and service delivery
-

4. Product Scope

In Scope (MVP)

- Business Landing Page
- Mini Store / Service Catalog (no checkout)
- Request Quote / Book Service flow
- Client Portal
- Admin Portal

- Blog
- Contact & Communication tools

Out of Scope (Future)

- Full e-commerce checkout
 - Automated billing & subscriptions
 - Advanced analytics dashboards
 - Marketplace functionality
-

5. Key Features & Requirements

5.1 Public Website (Landing Page)

Purpose: Brand presentation, service discovery, lead generation

Requirements

- Clean, modern, professional UI
- Clear value proposition
- Sections:
 - Hero (what we do + CTA)
 - Services overview
 - Mini product/service catalog
 - Why Tech Soutenir
 - Testimonials (future-ready)
 - Blog preview
 - Contact section

- SEO-friendly structure
 - Fast loading and mobile-responsive
-

5.2 Mini Store (Catalog Only)

Purpose: Showcase services/products without checkout

Requirements

- Display services/products with:
 - Title
 - Description
 - Pricing (optional / indicative)
 - “Request Quote” CTA
 - No cart or payment processing
 - Filter by category (e.g. IT Support, Development, Consulting)
-

5.3 Request Quote / Book Service

Purpose: Convert visitors into leads

Requirements

- Simple form capturing:
 - Name
 - Email
 - Phone
 - Service type
 - Description of request

- File upload (optional)
 - Auto-notification to Admin
 - Confirmation message to user
 - Stored in Admin Portal
-

5.4 Client / Customer Portal

Purpose: Secure workspace for ongoing client engagement

Core Features

- Login / Signup
- Client Dashboard:
 - Active services/projects
 - Status updates
- Document upload & download
- Support ticket system
- Project/request tracking
- Internal messaging with admin
- Notifications (status updates, messages)

Security

- Encrypted authentication
 - Role-based access
 - Secure file storage
-

5.5 Admin Portal

Purpose: Internal operations & service management

Core Features

- User & client management
 - Service/project tracking
 - File management
 - Ticket management
 - Task assignment
 - Status updates
 - Notifications to clients
 - Blog content management
-

5.6 Blog

Purpose: SEO, authority building, education

Requirements

- CMS-enabled
 - Categories (Tech Tips, Cybersecurity, Business IT)
 - Search-friendly URLs
 - Shareable posts
-

6. Technical Requirements

- Mobile-responsive design
- SEO-optimized structure
- Secure authentication (HTTPS, encryption)

- Fast page load performance
 - Scalable architecture
 - Hosting: Hostinger
 - Admin access secured
 - Backup & recovery enabled
-

7. Non-Functional Requirements

- Reliability & uptime
 - Security-first approach
 - Easy maintainability
 - Clean UI/UX
 - Accessibility considerations
-

8. Brand & Experience Guidelines

Brand Positioning

- Professional
- Dependable
- Structured
- Innovative but practical

Tone

- Clear
- Helpful

- Trust-building
 - Not overly technical
-

9. Future Expansion (Post-MVP)

- Full e-commerce checkout
 - Subscription-based services
 - Client analytics dashboards
 - Automated billing & invoicing
 - AI-assisted support
 - Partner/vendor integrations
-

10. Summary

This PRD defines **Tech Soutenir's digital foundation**: a professional business presence combined with operational tools that improve efficiency today and enable growth tomorrow. The focus is clarity, trust, and scalability without unnecessary complexity.

If you want, next we can:

- Convert this into a **pitch deck**
- Create **user flows**
- Write **UI wireframe descriptions**
- Or scope **Phase 2 features** clearly
